SUMMARY

Product leader with 15+ years across engineering, consulting, operations, and product management. Owned P&L for a $150M+ AI decisioning portfolio at IBM serving the world's largest banks and retailers, and currently leading the productization of an engineering-centric organization at AOT Technologies: first product framework, first design and marketing hires, 4x delivery velocity, and 20% month-over-month SaaS revenue growth. Hands-on developer roots in Python and Go. Specialty: taking AI from demo to deployed, then navigating the organization so it actually moves revenue, retention, and compliance outcomes. Specializing in SaaS, Roadmapping, Product Discovery, and Product Marketing.

PROFESSIONAL EXPERIENCE

AOT Technologies Jul 2025 - Present
Lead Product Manager Toronto, Canada

- Recruited to solve a problem the company had failed at multiple times: converting bespoke consulting assets into a scalable SaaS product. Established the first product management function, introducing structured discovery, data-driven roadmap prioritization, and the company's inaugural Product Design and Product Marketing teams.
- Refocused delivery in a mature, engineering-centric org: consolidated disparate core products into a SaaS-first platform and moved from two annual releases across three deployment flavors to consistent quarterly releases, a 4x increase in feature delivery velocity within six months.
- Improved product-market fit with measurable first-year results: +22-point NPS gain and 20% month-over-month SaaS revenue growth.
- Shipped AI capabilities into the core platform, including an AI-driven application builder and a hosted MCP server for agentic integrations.

IBM Aug 2021 - Jul 2025
Senior Product Manager, AI Decisioning Portfolio Toronto, Canada

- Owned strategy, GTM, and P&L for a $150M+ annual revenue portfolio of AI/ML decisioning and automation products serving global BFSI and enterprise retail clients; started by leading a single product and earned ownership of the full portfolio.
- Drove 20% average year-over-year revenue growth by integrating predictive analytics into decisioning workflows at the world's largest banking and retail institutions.
- Led the portfolio's transition from legacy rules-based automation to agentic AI workflows: 45% reduction in operational cycle times for BFSI clients while maintaining a 98% compliance rate across regulatory audits.

Odotrack Nov 2019 - Aug 2021
Product Manager Montreal, Canada

- Grew a last-mile delivery tracking platform into a broader fleet operations product: identified expansion opportunities through qualitative interviews and quantitative usage analysis, then launched route optimization, ELD compliance, and electronic proof-of-delivery capabilities for trucks and fleets.
- Owned backlog and roadmap for the B2B SaaS platform, translating market segmentation and customer feedback into prioritized initiatives aligned with executive objectives.
- Delivered wireframes, user stories, and acceptance criteria that shipped features improving operational efficiency and user experience by 30%.

EARLIER CAREER

MYR POS Nov 2017 - Dec 2019
Head of Operations (Product & Growth) Montreal, Canada

- Identified operational inefficiencies through data modeling and deployed automation that reduced costs by 65%.
- Led product and growth through 400% year-over-year customer acquisition growth at a fintech POS startup, driving the hard prioritization and scaling decisions that kept the product and team ahead of demand.

Allagma Technologies Apr 2013 - Nov 2017
Consultant Montreal, Canada

- First client-facing role: translated customer problems into product requirements and led phased POS system deployments for a national retail client, delivering incremental value on schedule.

Freelance Jul 2010 - Jun 2013
Backend Developer Remote

- Engineered automation solutions in Python and Go, including distributed web scrapers, decentralized crawlers, and database automation frameworks; the technical foundation behind later AI and automation product work.

SKILLS

Product Leadership: Product Strategy and Vision, Portfolio Management & P&L Ownership, Roadmap Prioritization, Go-to-Market (GTM), Pricing and Packaging, OKRs & Executive Communication, Team Building & Mentorship

AI and ML: AI Decisioning, Agentic Workflows and Orchestration, Generative AI and LLMs, RAG, Model Context Protocol (MCP), ML Product Lifecycle & Model Monitoring, Predictive Analytics
